Flag: Follow up

Good morning George:

As previously discussed with you and in accordance with guidance you have provided, Dynegy is submitting the attached Concrete Floor and Trench Sampling Plan and Report that includes Tables and Figures showing all the PCB sampling data and locations described in the Plan. Based on your prior concurrence Dynegy implemented the Plan and the results show, as presented in Tables 1-4 of the Report, show that all samples are either non-detect or below the site-specific cleanup objectives for PCBs (i.e. <0.74 ppm for "common" Aroclors, and 1 ppm total PCBs, per EPA's Industrial Regional Screening Level). A copy of this report and all the laboratory reports will be burned to a CD and mailed out to you today.

As mentioned last week, we hoping to receive your decision approving the reuse of all concrete trench and floor material in the very near future so that Unit 3 & 4 trenches may be left in place and demolished with the rest of power block foundation. As we have discussed, segregation and separate handling of this material is very expensive and time-consuming and unnecessary based on the data that has been collected. Our contractor informed me last Friday that in order for them to remain on schedule they would need to start separating out the trench material on Unit 3, beginning on September 25th, if we do not have a decision and approval from you by then. As there is a significant additional cost to Dynegy for separating out the trench material, we hope to avoid that outcome.

We certainly understand your time constraints, but kindly request that you expedite your review of our data and approve the reuse of the trench material. We appreciate your time and effort and look forward to hearing from you soon.

Regards, Barb

Good morning George:

Meg forwarded your e-mail to me. Let me check our schedules and I'll get back to you later this afternoon or first thing in the morning. Also, we are about to send you all the sample data we've collected as per the sampling plan. I hope to have that to you tomorrow also.

I'll be in touch soon, Barb

Good Morning

I will be in the Los Angeles area from September 2-5. I am looking to come and do a site visit if possible. I am wondering what days/times would be the most convenient. I also need to know in order to provide a kind of itinerary for my travel. Thank you for your time and input. I look forward to seeing you and the sites soon.

Thank you

George Randell
